Be in Control of Your Workers Compensation Claims Reporting

Workers Compensation is an intricate part of your insurance portfolio as it can be one of the largest insurance costs for your business. So as an employer you want to be in control of your workers compensation claims cost and be able to respond faster to your business needs.

As part of a complete workers compensation solution for your business, QBE can provide you access to our claims reporting system, @QBEConnect.

@QBEConnect is an online reporting and analysis tool that enables you to manage your business workers compensation claims and report on current data.

Using @QBEConnect can become an integral tool to manage your workers compensation business. It gives you the ability to respond faster to your business

needs and therefore better manage workplace risks and reduce workers compensation costs.

1. Real time access to current data

Data is uploaded daily on @QBEConnect providing you with immediate access to current information any day of the week for NSW, ACT, NT and WA. Data for VIC is updated weekly.

2. Reporting made easy

Unlike other claims reporting tools, @QBEConnect is the 'first of its kind' to provide a drill-down function allowing you to create and interpret data in many different ways.

The tool is web-based with a graphical reporting interface, which makes the report easier to interpret and understand. You can select from either standard reports using the reporting Wizard or, alternatively, create your own style of report using the custom reporting tool.

A co-branding option gives you the ability to personalise your reports.

3. Report access and management you're in control

Once you are set up to use @QBEConnect you control the administration. You can allocate your staff access to particular policies and states, and save reports for shared or private access. Online help can be accessed at any time. Because you're in control, and @QBEConnect is web-enabled, it has greater penetration into your business.

4. Scheduling Reports - we have a solution

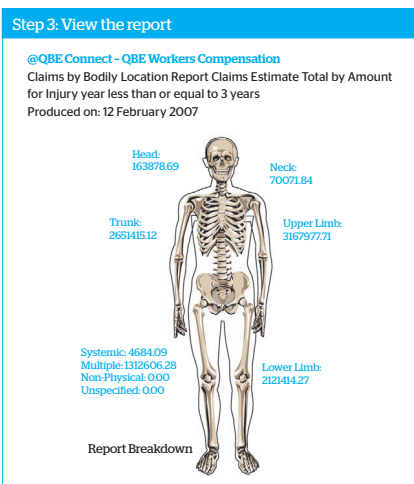

Don't have the time to access your reports via the web, @QBEConnect has the solution. You can schedule reports on @QBEConnect so that reports are emailed directly to your email inbox automatically at a predetermined scheduled time and date set by you.

5. Standard reports - three easy steps

You can select from various standard reports, including charts, in three easy steps:

Step 1: Choose a report

Step 2: Select the parameters

Like to Know More?

If you want access to @QBEConnect or find out more how it can assist you, please contact your QBE representative.
